ECOLOGY

ALL FORMS OF LIFE IN RELATION TO ENVIRONMENT

OFFICAL PUBLICATION OF THE

ECOLOGICAL SOCIETY OF AMERICA

VOLUME 67, 1986

Published Bimonthly at Tempe, Arizona

by the

ECOLOGICAL SOCIETY OF AMERICA

The Ecological Society of America

OFFICERS FOR 1986–1987

President: JEAN H. LANGENHEIM, Division of Natural Science, University of California–Santa Cruz, Santa Cruz, California 95064

Vice President: H. RONALD PULLIAM, Department of Zoology, University of Georgia, Athens, Georgia 30602

Secretary: HAZEL R. DELCOURT, Department of Botany, University of Tennessee, Knoxville, Tennessee 37996

Treasurer: PAUL A. COLINVAUX, Department of Zoology, Ohio State University, Columbus, Ohio 43210

Business Manager: DUNCAN T. PATTEN, Ecological Society of America, Center for Environmental Studies, Arizona State University, Tempe, Arizona 85287

AIMS

THE ECOLOGICAL SOCIETY OF AMERICA was founded in 1915 for the purpose of giving unity to the study of organisms in relation to environment, as a means of furthering interchange between persons who are approaching widely different groups of organisms from closely related points of views, for the stimulation of ecological research, and to assist the development of the utilities which may be served by ecological principles.

MEMBERSHIP

Membership is open to persons who are interested in the advancement of ecology or its applications, and to those who are engaged in any aspect of the study of organisms in relation to environment.

The following classes of membership and their annual dues for 1987 are:

Associate Members: $20.00

Active Members: $45.00

Sustaining Members: $60.00

Student Active Members: $35.00

Student Sustaining Members: $50.00

Emeritus Members: Special rates available
(contact the Business Manager for information)

Family: $10.00 (Resides in same household as member of another class)

Active, Student Active, Sustaining, and *Student Sustaining Members* receive the bimonthly journal ECOLOGY. *Sustaining* and *Student Sustaining Members* also receive ECOLOGICAL MONOGRAPHS, the quarterly journal for longer articles. Members in arrears for dues will, on payment, be supplied with back numbers for up to one year, but the journals do not hold themselves responsible for reserving back numbers in anticipation of payment of back dues.

All members receive the BULLETIN OF THE ECOLOGICAL SOCIETY OF AMERICA, issued by the Society in March, June, September, and December. It contains announcements of meetings of the Society and related organizations, programs, awards, articles, and items of current interest to members.

Associate Members do not receive ECOLOGY or ECOLOGICAL MONOGRAPHS and are not eligible for office, but may become members in any one of the above classes upon payment of the appropriate dues.

Application blanks for membership may be obtained from the Business Manager, to whom all correspondence concerning membership should be addressed. Checks accompanying membership application should be made payable to the ECOLOGICAL SOCIETY OF AMERICA.

TABLE OF CONTENTS, Volume 67, 1986

Number 1, February

Nobel, P. S., and E. Quero. Environmental productivity indices for a Chihuahuan Desert CAM plant, *Agave lechuguilla* 1–11

Hadley, J. L., and W. K. Smith. Wind effects on needles of timberline conifers: seasonal influence on mortality 12–19

Kalisz, S., and J. A. Teeri. Population-level variation in photosynthetic metabolism and growth in *Sedum wrightii* 20–26

Michaels, H. J., and F. A. Bazzaz. Resource allocation and demography of sexual and apomictic *Antennaria parlinii* 27–36

Clay, K., and D. A. Levin. Environment-dependent intraspecific competition in *Phlox drummondii* 37–45

Gurevitch, J. Competition and the local distribution of the grass *Stipa neomexicana* 46–57

Dunwiddie, P. W. A 6000-year record of forest history on Mount Rainier, Washington 58–68

Birk, E. M., and P. M. Vitousek. Nitrogen availability and nitrogen use efficiency in loblolly pine stands 69–79

Groffman, P., G. House, P. Hendrix, D. Scott, and D. A. Crossley, Jr. Nitrogen cycling as affected by the interactions of components in a Georgia piedmont agroecosystem 80–87

Bowden, W. B. Nitrification, nitrate reduction, and nitrogen immobilization in a tidal freshwater marsh sediment 88–99

Kratz, T. K., and C. B. DeWitt. Internal factors controlling peatland-lake ecosystem development 100–107

Moran, N. Benefits of host plant specificity in *Uroleucon* (Homoptera: Aphididae) 108–115

Denno, R. F., D. Jacobs, and L. W. Douglass. Effects of crowding and host plant nutrition on a wing-dimorphic planthopper 116–123

Turchin, P. B. Modelling the effect of host patch size on Mexican bean beetle emigration 124–132

Johnson, R. A. Intraspecific resource partitioning in the bumble bees *Bombus ternarius* and *B. pennsylvanicus* 133–138

Whitham, T. G. Costs and benefits of territoriality: behavioral and reproductive release by competing aphids 139–147

Dewey, S. L. Effects of the herbicide atrazine on aquatic insect community structure and emergence 148–162

Hurd, L. E., and I. H. Rathet. Functional response and success in juvenile mantids 163–167

Smallwood, P. D., and W. D. Peters. Grey squirrel food preferences: the effects of tannin and fat concentration 168–174

Southerland, M. T. Behavioral interactions among four species of the salamander genus *Desmognathus* 175–181

Bortolotti, G. R. Evolution of growth rates in eagles: sibling competition vs. energy considerations 182–194

Dueser, R. D., and J. H. Porter. Habitat use by insular small mammals: relative effects of competition and habitat structure 195–201

Jones, W. T. Survivorship in philopatric and dispersing kangaroo rats (*Dipodomys spectabilis*) 202–207

Palumbi, S. R. How body plans limit acclimation: responses of a demosponge to wave force 208–214

Rodriguez, J., and M. M. Mullin. Diel and interannual variation of size distribution of oceanic zooplankton biomass 215–222

Lane, P. A. Symmetry, change, perturbation, and observing mode in natural communities 223–239

PYKE, D. A., AND J. N. THOMPSON. Statistical analysis of survival and removal rate experiments 240–245
MUENCHOW, G. Ecological use of failure time analysis 246–250
GUREVITCH, J., AND S. T. CHESTER, JR. Analysis of repeated measures experiments 251–255
SWIHART, R. K., AND N. A. SLADE. The importance of statistical power when testing for independence in animal movements 255–258
LACY, R. C., AND C. E. BOCK. The correlation between range size and local abundance of some North American birds 258–260
SCHOENER, T. W., J. ROUGHGARDEN, AND T. FENCHEL. The body-size–prey-size hypothesis: a defense 260–261
DAVIDAR, P., AND E. S. MORTON. The relationship between fruit crop sizes and fruit removal rates by birds 262–265
HUSTON, M. Size bimodality in plant populations: an alternative hypothesis 265–269
HASSAN, M., AND N. WEST. Dynamics of soil seed pools in burned and unburned sagebrush semi-deserts 269–272
RUNNING, S. W., D. PETERSON, M. SPANNER, AND K. TEUBER. Remote sensing of coniferous forest leaf area 273–276
MCAULIFFE, J. R. Herbivore-limited establishment of a Sonoran Desert tree, *Cercidium microphyllum* 276–280

NUMBER 2, APRIL

TESSIER, A. J. Comparative population regulation of two planktonic Cladocera (*Holopedium gibberum* and *Daphnia catawba*) 285–302
STRAYER, D., AND G. E. LIKENS. An energy budget for the zoobenthos of Mirror Lake, New Hampshire 303–313
WALLACE, R. L., AND W. T. EDMONDSON. Mechanism and adaptive significance of substrate selection by a sessile rotifer 314–323
BENCE, J. R., AND W. W. MURDOCH. Prey size selection by the mosquitofish and its relation to optimal diet theory 324–336
VANNI, M. J. Fish predation and zooplankton demography: indirect effects .. 337–354
PERSSON, L. Effects of reduced interspecific competition on resource utilization in perch (*Perca fluviatilis*) 355–364
WIENS, J. A., J. T. ROTENBERRY, AND B. VAN HORNE. A lesson in the limitations of field experiments: shrubsteppe birds and habitat alteration 365–376
LIMA, S. L. Predation risk and unpredictable feeding conditions: determinants of body mass in birds 377–385
BUCHSBAUM, R., J. WILSON, AND I. VALIELA. Digestibility of plant constituents by Canada Geese and Atlantic Brant 386–393
ROBINSON, S. K. Three-speed foraging during the breeding cycle of Yellow-rumped Caciques (Icterinae: *Cacicus cela*) 394–405
BATZLI, G. O. Nutritional ecology of the California vole: effects of food quality on reproduction 406–412
LINDSTEDT, S. L., S. W. BUSKIRK, AND B. J. MILLER. Home range, time, and body size in mammals 413–418
CRAIG, T. P., P. W. PRICE, AND J. K. ITAMI. Resource regulation by a stem-galling sawfly on the arroyo willow 419–425
WOLDA, H., AND D. W. ROUBIK. Nocturnal bee abundance and seasonal bee activity in a Panamanian forest 426–433
SIH, A. Antipredator responses and the perception of danger by mosquito larvae 434–441
BULTMAN, T. L., AND S. H. FAETH. Experimental evidence for intraspecific competition in a lepidopteran leaf miner 442–448
FEINSINGER, P., K. G. MURRAY, S. KINSMAN, AND W. H. BUSBY. Floral neighborhood and pollination success in four hummingbird-pollinated cloud forest plant species 449–464

McEvoy, P. B. Niche partitioning in spittlebugs (Homoptera: Ceropidae) sharing shelters on host plants 465–478
Faeth, S. H. Indirect interactions between temporally separated herbivores mediated by the host plant 479–494
Barton, A. M. Spatial variation in the effect of ants on an extrafloral nectary plant 495–504
Risch, S. J., D. Pimentel, and H. Grover. Corn monoculture versus old field: effects of low levels of insecticides 505–515
Smiley, J. T. Ant constancy at *Passiflora* extrafloral nectaries: effects on caterpillar survival 516–521
Armbruster, W. S. Reproductive interactions between sympatric *Dalechampia* species: are natural assemblages "random" or organized? 522–533
Stewart, G. H. Population dynamics of a montane conifer forest, western Cascade Range, Oregon, USA 534–544
Fowler, N. L. Density-dependent population regulation in a Texas grassland 545–554
Tilman, D. Nitrogen-limited growth in plants from different successional stages 555–563
Forseth, I. N., and A. H. Teramura. Kudzu leaf energy budget and calculated transpiration: the influence of leaflet orientation 564–571
Roach, D. A. Timing of seed production and dispersal in *Geranium carolinianum*: effects on fitness 572–576
Vogt, K. A., C. C. Grier, S. G. Gower, D. G. Sprugel, and D. J. Vogt. Overestimation of net root production: a real or imaginary problem? 577–579
Lauenroth, W. K., H. Hunt, D. Swift, and J. Singh. Reply to Vogt et al. 580–582

Number 3, June

Heinrich, B. Thermoregulation and flight activity of a satyrine, *Coenonympha inornata* (Lepidoptera: Satyridae) 593–597
Knapp, R., and T. M. Casey. Thermal ecology, behavior, and growth of gypsy moth and eastern tent caterpillars 598–608
Tracy, C. R., and K. A. Christian. Ecological relations among space, time and thermal niche axes 609–615
Rollo, C. D. A test of the principle of allocation using two sympatric species of cockroaches 616–628
Jackson, J. K., and S. G. Fisher. Secondary production, emergence, and export of aquatic insects of a Sonoran Desert stream 629–638
Borowicz, V. A., and S. A. Juliano. Inverse density-dependent parasitism of *Cornus amomum* fruit by *Rhagoletis cornivora* 639–643
Veblen, T. T. Treefalls and the coexistence of conifers in subalpine forests of the Central Rockies 644–649
Dickerman, J. A., A. J. Stewart, and R. G. Wetzel. Estimates of net annual aboveground production: sensitivity to sampling frequency 650–659
Shaver, G. R. Woody stem production in Alaskan tundra shrubs 660–669
Twilley, R., A. E. Lugo, and C. Patterson-Zucca. Litter production and turnover in basin mangrove forests in southwest Florida 670–683
Johns, A. D. Effects of selective logging on the behavioral ecology of West Malaysian primates 684–694
Goldberg, D. E., and R. M. Turner. Vegetation change and plant demography in permanent plots in the Sonoran Desert 695–712
Morin, P. J. Interactions between intraspecific competition and predation in an amphibian predator-prey system 713–720
Southerland, M. T. Coexistence of three congeneric salamanders: the importance of habitat and body size 721–728
Petranka, J. W., and A. Sih. Environmental instability, competition, and density-dependent growth and survivorship of a stream-dwelling salamander 729–736

HOLOMUZKI, J. R. Predator avoidance and diel patterns of microhabitat use by larval tiger salamanders 737–748
MCCOY, E. D., S. S. BELL, AND K. WALTERS. Identifying biotic boundaries along environmental gradients 749–759
KRUEGER, K. Feeding relationships among bison, pronghorn and prairie dogs: an experimental analysis 760–770
MARSH, C. P. Rocky intertidal community organization: the impact of avian predators on mussel recruitment 771–786
HANSEN, A. J. Fighting behavior in Bald Eagles: a test of game theory 787–797
WEST, L. Intertidal variation in prey selection by the snail *Nucella* (=*Thais*) *emarginata* 798–809
WILSON, W. H., JR. Detachment of egg masses of a polychaete: environmental risks of benthic protective development 810–815
